GOOD CLOTHES don't grow in every shop. Both the cloth and linings of our clothes have been watered—not till they sprouted, but till the sponging and respousing have taken every bit of stretch and shrink out of the goods.

¶That's the first step in growing these clothes. Good materials are first *made fit* to develop into *good* clothes.

¶When the give and take is all out, a style and a fit is given the garments that you can see here for yourself. If you like the clothes you'll be safe in buying them because the looks are there to stay; these suits and overcoats are tailored throughout by hand.

Table of Weights and Measurements

1 cupful equals half a pint.

14 tablespoonfuls equal 1 cupful.

3 teaspoonfuls equal 1 tablespoonful.

1 cupful of butter or lard is $7\frac{1}{2}$ ounces.

2 tablespoonfuls of butter are 1 ounce.

1 level cupful of flour is 4 ounces.

1 quart of flour just rounded over is 1 pound.

1 moderately heaped tablespoon is 1 ounce.

1 cupful of milk is 8 ounces.

1 cupful molasses holds 12 ounces.

1 level cupful of granulated sugar is 7 ounces, a round cupful is half a pound.

1 level cupful of brown sugar is 6 ounces.

Soups

Many have been the opinions expressed about the relation of the soup to the rest of the meal, some considering it a meal in itself and others looking upon it as flavored water, only fit for children and invalids. Most of us coincide with the French authority who calls soup the preface to the feast, and which is, in fact, a stimulant for the more or less elaborate menu to follow.

As a rule, for a large dinner of many courses, the soup should be as light as possible, whereas for a plain dinner it may be much richer and more satisfying. In the making of soups there is a difference of taste as to which portion of the beef is best for the purpose. The shinbone contains the marrow which adds strength and thickness to the soup, while the neck makes a more nutritious soup. A piece of beef liver imparts a pleasant flavor to many soups.

In making soup, bring the cold water in the soup pot with the meat and bones to a boil slowly, and let it simmer for hours, never boiling and never ceasing to simmer. Skim off every bit of fat. Do not use too much salt; a little is advisable, as it causes the scum to rise. Long soaking in cold water draws out the juices of the meat and dissolves the gelatine. Bones, both fresh and those partially cooked, meats of all kinds, vegetables of various sorts, all may be added to the stock pot, to give flavor and nutriment to the soup. There are three classes of soup—clear, thick and purees. The first is clear and thin; the second about as thick as cream, but not transparent, while in a puree all the ingredients are rubbed through a sieve.

Beef Soup a la Julienne.

Cook all the vegetables in a separate kettle. Use a nice piece of soup meat, about four pounds, and a large soup bone. Cut up two carrots, two turnips, quarter of a head of cabbage, one head of celery, a few tomatoes, some ham; cut up very fine a handful of peas and a few tablespoons of corn (you may use canned). When tender pour your soup stock over the cooked vegetables. Season to taste and serve. You may add some noodles, cut into little squares, but not too many, or it will be thick.

Beef Tea.

One pound round steak, have all fat removed, and cut into dice. Add one pint cold water, sprinkle salt over meat and allow to stand half an hour; then put in a clean kettle and boil slowly for twenty minutes, covering with a lid. Strain. Can be used either hot or cold.

MRS. WM. GOTTSTEIN.

Clam Nectar.

Heat clam nectar (canned or fresh clam juice). Add pepper, salt and a little grated onion. Serve in bouillon cups with a teaspoonful of whipped cream on top.

MRS. M. A. GOTTSTEIN.

Cream of Mushroom Soup.

Half pound of mushrooms, four cups chicken stock, few slices onion, quarter cup butter, quarter cup flour, one cup cream; salt, pepper; two tablespoons Sauterne. Chop mushrooms, add to chicken stock with onion; cook twenty minutes and rub through a sieve. Cook flour and butter together; then add cream, salt and pepper to taste. Mix above stock with this cream sauce and just before serving add wine. Serve with croutons.

R. LOBE.

Cream of Celery Soup.

One and a half pounds of lean veal chopped; one moderately young chicken, jointed; add two quarts of cold water and simmer until meat is cooked. Remove the breast of chicken, and all best parts of the meat. Return the bones to the pot and boil hard for one hour. Strain, and let cool over night. (The chicken will make a dozen croquettes, or nice salad). About an hour before using the soup skim off all the fat, and put the stock, which should be a jelly, into a kettle. Let it slowly come to a boil, salt and pepper it. Add a cupful and a half of good, sweet cream, and two teaspoonfuls of flour made smooth in the cream and brought to a boil. Have ready a cupful of celery, chopped fine; stew it for half an hour in a little salted boiling water; drain off the water and add the celery to the soup. Have a teaspoonful of cracker crumbs in the bowl, and serve immediately, before the crackers are soaked.

MRS. M. M. FREDRICK.

Cream of Peas or Asparagus.

Cook peas or asparagus in stock until soft; pass all through sieve. Heat one pint cream, pour in tureen, and pour boiling stock in. Add custard squares.

Choose about 40 crawfish and boil. Remove from fire and drain. Clean the heads. Keep 30 of the shells and also the remains, which you set to boil in a quart of water. Peel the tails and chop them fine. Make a paste with the meat, to which add soaked bread, a large spoonful of fried onion and chopped parsley, salt and pepper. With this fill the 30 shells and put aside. Start the soup by frying onion in butter, add some flour for thickening, green onions and minced parsley. When browned pour in the bouillon, also the soup made from the remains of the head seasoned with salt and pepper and two bay leaves. Let boil slowly for $\frac{1}{2}$ hour. When ready to serve take each head, roll in flour and fry in butter until crisp all around and put in the soup. Let boil 3 or 4 minutes.

When ready to serve add cream to taste, also salt and pepper if not sufficiently seasoned.

Add a dessertspoon of Worcestershire sauce, boil up, strain and add the cut up ox tail and a glass of sherry wine.

MRS. H. ELSTER.

Oyster Stew.

After all bits of shell are removed from a pint of oysters and their liquor has been strained, let the liquor come to a boil and remove all scum, then add a teaspoon of butter, salt and pepper to taste and 1 pint milk. Fish

Fish is considered by medical authorities to be the best brain food, besides being one of the most easily digested. The first consideration in buying fish is its freshness, and it should be cleaned as soon as brought to the house, wiped dry, sprinkled with a little salt and placed in the ice-box. Fresh fish have firm flesh, plump eyes and red gills. Fish must be cooked carefully, as underdone fish is unpalatable as well as unwholesome, while too much cooking destroys the flavor.

Fried Fish.

Clean fish. sprinkle with salt and pepper, dip in flour or crumbs, then in egg and again in crumbs. Let stand few minutes. Then fry a golden brown in deep fat.

Broiled Fish.

Split a thin fish down the back or cut thick fish into slices and remove skin and bones. Oily fish need only salt and pepper, but dry fish should be spread with flakes of butter before broiling. Use double wire broiler and grease it. Cook about 8 to 12 minutes. Move the broiler so that it broils evenly. Broil over clean fire or in hot broiling gas oven. Remove to a hot platter, spread with slices of lemon and garnish with parsley.

Butter Sauce Fish.

Wash and salt your slices of fish for several hours. To about 3 pounds of fish take a good sized onion sliced, a carrot cut in round slices, a few sprigs of parsley. Let the water, which should almost cover the fish, boil with the vegetables for a few minutes. Place your fish in the stewpan. Put in a good piece of butter, some ground white pepper, and a dash of cinnamon. Let boil for about 20 minutes, taste and add more salt or pepper if desired. Have ready the yolks of 4 eggs well beaten, with a heaping teaspoonful of flour. Place your fish on a platter, strain the sauce, then return to kettle, pour over the eggs. When the liquid boils, pour the egg mixture slowly into the kettle, stirring constantly for about 2 minutes. Do not take your spoon out of the gravy or your sauce will curdle. Strain into your gravy boat, leaving some to pour over the fish. Garnish with the sliced carrots and parsley minced.

Planked Fish.

Fish is planked when baked on a board in the oven. The board must be very hot. Place the fish on board, then season with salt and pepper and a little butter. Place the skin down on the board. Brush with butter and with salt and pepper. Baste often with melted butter and bake until golden brown. Serve with parsley, lemon or pickle sliced. White fish is best served in this style.

Cod Fish Balls.

Put the fish to soak over night in lukewarm water. Change again in the morning and wash off all the salt. Cut into pieces and boil about 15 minutes, pour off this water and put on to boil again with boiling water. Boil 20 minutes this time, drain off every bit of water, put on a platter to cool and pick to pieces as fine as possible, removing every bit of skin and bone. When this is done, add an equal quantity of mashed potatoes, a lump of butter, a very little salt and pepper, beat up one or two eggs, a little milk if necessary, and work all in a dough. Flour your hands well and form into cakes. Fry in hot butter or dripping.

MRS. A. COBLENTZ.

Pickled Carp.

After cleaning a carp, making as small an opening as possible, tie up the head, put the fish in a fish kettle, pour over boiling vinegar. After a few minutes add a tumblerful of red wine, seasoning and 2 carrots and 3 onions, cut into slices, and a small quantity each of sage, thyme, laurel leaves, parsley, cloves and garlic, and then set the kettle on the fire and allow it to simmer gently for an hour. Let the fish remain in this until quite cold, when it will be ready to serve.

Finnan Haddie.

Put finnan haddie in pan of cold water. Let come to a boil. Remove and shred. Make a rich cream sauce and add finnan haddie. Serve with minced parsley on toast.

MRS. M. A. GOTTSTEIN.

Fish Croquettes.

Any cold fish chopped fine. Make thick cream sauce, using $\frac{1}{2}$ cupful cream, thicken with cracker meal, add 1 egg, chopped parsley. Let mixture cool, form into cakes, dip in egg and cracker meal and fry.

MRS. E. MORGENSTERN.

Fish in Oil.

For about 3 slices of salmon take 2 tablespoonfuls oil, put in iron pan and heat red hot, then stir in 1 tablespoonful flour and rub very smooth. Add enough cold water for gravy. Have small piece of onion and lots of parsley chopped very fine. Shell Fish

The principal shell fish obtained on this coast are oysters, crabs, shrimps and clams. It is absolutely imperative that they should be fresh. The oyster is the most edible, delicious and nutritious of its species, and can be served in a great variety of ways. The small ones have the finest flavor. Never salt oysters for soups or stews until just before removing them from the fire, or they will shrivel up, and always serve immediately after cooking.

Salads

Lettuce is the vegetable most commonly used in salad. The coarser outer leaves should be removed, and only the tender crisp heart used. Look over carefully and wash in cold water all vegetables. See that they are freed from every particle of sand and grit. Never combine the meat, vegetables and dressing of a salad until the last moment before sending to the table, and then do so as lightly as possible. Do not pack or smooth down in the dish. Serve salad as a separate course. The heavy salads, as chicken and lobster, are more suitable for luncheon and teas than for dinner. It is an improvement to fish, lobster and chicken salad if the meat or fish be allowed to marinate for a few hours in a dressing of one-third olive oil and two-thirds vinegar with a light seasoning of salt, pepper and mustard. All skin, bone and gristle should be removed from fish and meat. Then it is to be flaked or cut into small dice and piled upon lettuce leaves on a platter, mayonnaise spread over, and garnished with small lettuce leaves, slices of lemon, hard boiled eggs, capers, olives, pickles, beets, etc. Celery for salad should not be chopped, but sliced fine. Always use the very best oil. To fringe celery for a garnish, cut into 2-inch pieces; then stick several coarse needles in a cork, draw half the stalk of each piece of celery through the needles several times. Lay in cold water to crisp. Vegetable salads should be stirred as little as possible.

A little cold chicken, and some good bread and butter—a dill pickle and a glass of Independent Beer—isn't that a good appetizer?

Vegetables

All fresh vegetables should be put on to cook in boiling water, and should not be allowed to boil after they are done.

For onions, cabbage, etc., it is advisable to change the first water if the flavor is strong.

Dried peas, beans and lentils should be soaked over night in water and put on the boil in cold water.

Boil spinach in an uncovered pot to retain the color.

Add a little sugar to the water in which green corn and peas are boiled.

Never thicken vegetables by adding flour mixed with water. Always put butter or fat in a saucepan, then add the flour, allowing it to brown a little, and add liquid from vegetables and put all together. Put vegetables in cold water about half an hour before cooking.

The proportion of salt in cooking vegetables is a heaping table-spoonful to a gallon of water. A tiny piece of red pepper or a piece of bread put into the pot when vegetables or meat begins to cook will kill the unpleasant odor. Late in the season vegetables require a longer time to cook. The secret of having potatoes mealy and palatable is to cook them rapidly.

Meats

Meat should never be allowed to stand in the paper in which it is wrapped, as the paper absorbs the juices.

Meat should not be soaked in cold water, as the blood is drawn out and much of the nutriment is wasted.

Intense heat, as boiling and broiling, etc., hardens the outside, keeping the juices in, so in roasting beef have a skillet, very hot, with a little fat in, and sear the beef on both sides before putting it into the oven, thus preventing the juices from escaping. By cooking slowly after the first few minutes the meat will cook tender.

Prime beef is of a bright red color, dry and elastic to the touch, and the fat, which should be abundant, is white and firm.

The tenderloin and sirloin are the most desirable roasts. A rib roast is the most economical for a small family. The bones should be removed, as these furnish a valuable contribution to the soup kettle.

In breading meats be sure that the crumbs are very fine, or they will drop off in spots.

TIME FOR ROASTING MEATS

Beef—Fifteen minutes to a pound.

Mutton—Ten to the pound for rare, and 20 for the well done.

Lamb—Fifteen to 20 minutes to pound.

Veal—Twenty minutes to the pound.

Turkey—Medium sized, 3 hours.

Goose—Medium size, 2½ hours.

Chicken—One and a half to 2 hours.

Duck—One and a half to 2 hours.

Wild Duck—Twenty to 40 minutes.

For boiling meats, allow 20 minutes to a pound for fresh, and 35 for salt. Salt meat should be put on in cold water. Boiling or stewing fresh meats should be put on in hot water.

Then add a little finely chopped garlic. Simmer with as little water as possible for two hours. Then add a finely chopped carrot and a slice of rye bread and let cook until done. Cook slowly a long time, well covered. MRS. M. A. GOTTSTEIN.

Short Ribs of Beef Spanish.

Get the small ribs of beef and put on with water enough to cover, seasoning with salt, pepper, an onion and a tiny kernel of garlic. Let it cook about two hours, and then add a can of tomatoes and season highly either with red peppers or paprika or Gebhard's Chili Powder. The last is very fine for Spanish flavoring. Short ribs must cook at least three hours. MRS. WM. GOTTSTEIN.

After boiling about an hour and a half add five or six yellow turnips cut in small pieces, and half an hour before serving add six or eight potatoes cut in small pieces. Water must be added as necessary. A little sugar will improve the flavor, and as it simmers the turnips will soften and give the whole dish the appearance of a stew. MRS. WM. GOTTSTEIN.

Roast Beef.

Prime ribs of beef seasoned with pepper and salt and slices of onion and put in a very hot frying pan on top of the stove. Sear both sides and then place in oven, basting from time to time with a little water. Thicken sauce and add chopped parsley. MRS. M. A. GOTTSTEIN.

Boil 2 eggs hard and place in center of the meat which is made into a loaf. Bake in oven with plenty of chicken fat, tomato catsup and sliced onions and a little water, basting often.

MRS. S. ARONSON.

Mock Roast Duck.

Make a dressing of bread, season as for chicken and moisten. Take two large slices from round of veal, about 3 pounds. Salt the meat, cut out the bones, and close the holes with two or three stitches. Sew the edges together and put in the dressing. This will give the whole the appearance of a smooth oval body. Rub three ounces each of butter and flour to a cream and with a knife spread evenly over the form, except where it touches the pan. Put one-half a cup of water in the pan with the roll, and bake in moderate oven about one hour, or until thoroughly done. The crust should be a golden brown, like a roast duck. Remove carefully from the pan to platter, so as not to break the crust.

Note—Flank steak may be prepared the same way.

Veal Fricadelles.

Chop left-over cold veal very fine, add some cooked rice, season well with salt, pepper, paprika, left-over gravy and a well beaten egg. Form in cakes, dip in well-beaten egg and then in cracker meal, and fry a golden brown in chicken fat or plain fat.

Add to the vinegar when boiling four bay leaves, some whole pepper corns, cloves and whole mace. Pour this over the meat and turn it daily. In summer three or four days is the longest time allowed for the meat to remain in this pickle, but in winter eight or ten days is not too long. When ready to boil, heat some nice poultry drippings in a stew pan. Cut up one or two onions in it, add a little brine and stew until onions are tender, and then put beef in. Stew closely in a covered crock about three hours and thicken gravy with flour.

Then let same stew for three-quarters to an hour (or just long enough till nearly cooked), adding three potatoes quartered and enough water over same to boil. The potatoes should not be added until from 15 to 20 minutes before serving.

MRS. JACOB R. HILLER.

Chicken and Other Poultry

In choosing chickens, take those with yellow legs. The meat will be whiter when cooked, and the flavor is also considered superior to that of the dark-legged ones. In a young fowl there is a cartilaginous substance at the end of the breastbone which bends easily without breaking. If it has become bone, the fowl is old.

Young geese have yellow feet, slightly tinged with pink, which age deepens to a bright red. All fowls should be hung neck downward, so that they may bleed. Do not allow poultry to soak in water.

Singe poultry by holding over gas or blazing paper. Remove pin feathers with point of a knife. Remove internal organs at once. Make an incision at the vent and remove entrails, taking care not to break the gall bladder, which is near the liver. Remove windpipe and pull out the crop, and take out the oil bag near the tail. Take out the lungs and kidneys. Cut open the heart and press out the blood. Cut open the gizzard and remove the inner coat. Wash chicken and dry well.

In boiling fowls, put into hot water, unless soup is wanted; then put into cold. A little vinegar added to the water in which they are boiled makes fowls more tender.

In stuffing poultry, fill the body a little fuller than the breast, sew up the openings with strong white thread. Remove threads before sending to the table.

Stewed Chicken With Noodles.

Stew a chicken until tender. Season the gravy and add browned sliced onions. Boil noodles in salted water, put bits of butter and grated parmesan cheese with noodles. Add to stewed chicken. MRS. LOUIS RUBENSTEIN.

Puddings

Puddings are of three kinds—boiled, steamed and baked. To steam a pudding, put it into a buttered tin or granite dish, tie a cloth over the top, first dredging it with flour, and set into a steamer. Cover the steamer closely, allowing a little longer than you would for boiling. Boiling requires nearly twice the time necessary for baking.

Puddings should be turned out carefully.

Puddings that are to be boiled should be put into plenty of boiling water and kept at a steady boil. A boiled pudding should be turned over once or twice, so that it will not stick to the bottom of the kettle.

On removing a pudding tied in a cloth, plunge it quickly into a basin of cold water. If there is much bread in the pudding tie it rather loosely to allow for the swelling, but tie a batter pudding tightly. Use a small quantity of salt in all puddings. In baked puddings the custard separates into curds and whey if the oven is too hot. When a cloth is used for boiled puddings it must be dipped in hot water, wrung dry and well coated on the inside with flour before the pudding is enveloped in it. In making puddings always beat the eggs separately, adding the whites last. If boiled milk is used let it cool before adding the eggs. When fruit is added, stir in last. Serve boiled puddings immediately after taking from bag. Pudding cloths should never be washed with soap. Bake custards in cups set in a pan of hot water.

Pies

The quicker puff paste is made the lighter. The shortening should be ice cold, and the water ice water. The hands should be cool, and the pastry board of hardwood or marble. If puff paste is allowed to stand in ice-box 24 hours the quality will be improved. A brisk oven is needed for all pastry. If a piece of white paper be left in an oven for five minutes its color will show the temperature of the oven. Wash over the top of pie crust with a glaze made of milk and sugar. In making fruit pies, where the fruit is very juicy, a little flour will help absorb some of the juice. A little of the white of an egg brushed over the lower crust will prevent the crust from becoming soggy. Do not sprinkle with sugar until fruit is placed in the crust, as sugar sets the juices free. Make air-holes in all top crusts, so that the air may escape. Meringues for the top of pies are made in the proportion of a tablespoonful of sugar to the white of 1 egg. Never fill pies until just before putting them in oven. Before putting on top crust wet the rim of the lower, so that the pie will not burst. Remove pies at once from the tins, or they will become soggy. A few white bread crumbs sprinkled on the crust of cheese and fruit pies prevent the juices running out.

Puff Paste.

One cupful butter well worked out with a knife, so that all water is eliminated. Prepare butter the day before it is to be used, and put on ice; 1 cup flour mixed with a little water to a consistency that it can be rolled out. Place the whole piece of butter in the center, fold the dough over it and roll out three times. It is then put on ice for 20 minutes, rolled out twice again, and then cut out with two cutters, one without and one with a hole, the open space to be filled with oysters, sweetbreads and mushrooms or jelly. Bake in a moderate oven before filling.

Apple Custard Pie.

Slice apples thin, half fill your plates, and pour over them a custard made of 4 eggs and 2 cupfuls of milk, sweetened to taste.

Frozen Desserts

In heating milk for custards always use a double boiler. The rule for custards is 4 eggs to a quart of milk and a tablespoonful of sugar for each egg. Creams and custards that are to be frozen require an additional amount of sugar. When mixing eggs and hot milk stir in a small quantity slowly at first, so that the eggs may not curdle. A very moderate degree of heat must be employed for all sauces, creams and custards made of the yolks of eggs. Cream to be whipped should be put on ice some time before, as it whips more easily when very cold. Coffee ice cream should be thickened with corn starch. The flavoring for almond cream is made by pounding the kernels to a paste with rose water. For cocoanut cream use freshly grated cocoanut and add to cream, and sugar just before freezing. The milk should not be heated for pineapple, strawberry or raspberry cream. Berry flavors are best made by allowing berries to stand awhile well sprinkled with sugar, mashing and straining the juice. Canned berries may be used in the same way. Water ices are made from fruit juices mixed with water sweetened and frozen like ice cream. In making them, mix well before freezing or the sugar will sink to the bottom. It is best to make a syrup of sugar and water, and when cold add the fruit juice. Cream may be frozen without a patent freezer by using a tightly covered tin can and a wooden pail, scraping the sides and bottom of the can with a wooden spoon as the contents freeze. If cream does not whip readily, add a few drops of lemon juice. If cream is slightly sour, add a pinch of soda.

Tri-Color Frozen Pudding.

One pint cream whipped stiff and sweetened; divide in three parts. Flavor one with strawberry jam and add a couple of drops of Price's fruit coloring to make pink. Put chocolate in one part, and flavor the white or third part with vanilla. Wet pudding mold. Put in the chocolate cream, on top of which put a few dice shaped pieces of sponge cake, on each of which a drop of rum has been put, a few Maraschino cherries; then the vanilla cream with cake and cherries on top, and lastly the pink. Close mold and pack in ice three hours.

Cake

Use only the best ingredients for cake, and have all the materials ready before beginning to mix them. Measure and sift the flour and baking powder or soda, then sift again, weigh the butter, and put the exact quantity of milk or cream convenient to the mixing bowl; weigh or measure the sugar, line the baking tins with buttered paper, and see that the oven is being properly heated. Raisins must be seeded, currants looked over, washed well, dried and floured, and citron cut into small pieces and floured. Butter and sugar are to be well creamed first, beaten yolks of eggs stirred in and all beaten; then add milk, flour with baking powder and lastly whites of eggs beaten to a froth. Stir in whites as lightly as possible; add flavoring; put immediately into baking pans and bake at once. Fruit floured is added last. Spices should be mixed with the flour to be evenly distributed. Cakes baked in loaves require a moderate oven for the first 15 or 20 minutes, after which the heat may be increased. Layer cakes require a brisk oven. Cheese cakes require a hot oven. Ice the cake as soon as it is taken from the oven, using a thin broad-bladed knife, which dip frequently into cold water. When sour milk is used in a cake, always use soda, never baking powder. If soda and sour milk are called for, sweet milk and baking powder may be substituted by using $2\frac{1}{2}$ teaspoons of baking powder to a quart of flour. Avoid stirring the cake after sugar and butter are creamed, but beat from the bottom up and over. To test a cake when baking, insert a broom straw, if not sticky the cake is done. Do not open the oven door often. A dish of water in oven will prevent scorching. Another way is to lay a thin sheet of tin at the bottom of the oven and a piece of buttered brown paper on top of cake. Don't put cake into cake box until perfectly cold. In making icing, all the ingredients should be very cold. Always put a pinch of salt into the whites of eggs before beating.

Time table for baking cakes: Sponge cake, $\frac{3}{4}$ of an hour; pound cake, 1 hour; Fruit cake, 3 or 4 hours; cookies, from 10 to 15 minutes; cup cakes, 30 to 40 minutes; layer cakes, 15 to 20 minutes.

Cookies

These require a quick oven. If pans get cold before you can take cookies off, set back on the stove a few minutes, and the cakes will slip off easily. Flour pans lightly for baking sponge drops, lady fingers, anise cakes, etc. Glaze cookies by washing over top with milk or beaten egg and sprinkling sugar on top. A whole raisin, an almond blanched, a piece of citron or half a walnut may be used to decorate. Another way to glaze is, when cookies are about baked, rub over with a brush dipped in a syrup made of sugar and water and return to oven a moment.

Anise Seed Cookies.

Beat 4 eggs and $1\frac{1}{2}$ cups sugar very light. Then fold in $1\frac{1}{2}$ cups flour, seasoning with 12 to 15 drops anise oil (according to taste). Drop in pans and let stand over night to dry. Bake 10 minutes in a moderate oven.

MRS. J. GOLDSMITH.

Jelly Cookies.

Cream one cup butter and 2 cups sugar, add 2 eggs, 1 cup milk, flour to roll, 2 teaspoons baking powder, and little vanilla. For the top of half of them drop a little jelly in center before you bake. For the rest mix chopped nuts, sugar and cinnamon. Brush first with the yolk of beaten egg and then the sugar mixture.

$1\frac{1}{2}$ cups butter, 2 cups sugar, 6 whole eggs, $\frac{1}{2}$ cup sour milk. Mix with juice of 1 lemon, a little soda on tip of knife and large teaspoon baking powder with flour enough to roll. When cut brush with beaten eggs mixed with a little milk or anise seed or chopped nuts.

Flour your hands and mold into round cakes. Bake in quick oven. Flavor as desired.

Bake in regular baking pans, then cut in small squares and ice.

MRS. D. KOCH.

How to Make Two Cakes at One Time.

Have a long cake tin divided in the middle. When baking the cake, put half the quantity in one end of the tin. Add to the remainder spices, raisins, chopped nuts, etc., according to taste, and put in the other end of tin. This saves time in making and baking, and the result is two kinds of cake. If the family be small, there is less likelihood of having dry cake on hand, as would be the case with a large one.

Bread and Breakfast Foods

The more thoroughly bread is kneaded, the whiter and finer the texture. Turn the dough constantly, so that every portion is thoroughly worked. Knead until it is light and elastic to the touch. Allow it to rise to twice its bulk. If bread has become sour by being allowed to rise too long, a little soda mixed with warm water and carefully added to the dough will help correct the sourness.

A few mealy potatoes mashed and added to bread sponge will make bread lighter and keep fresh longer. Do not allow bread sponge to become either chilled or overheated, but if possible keep at a temperature of 75.

More time will be required for bread to rise in cold weather than in warm.

In cold weather cover bread pan with a heavy blanket.

Bread is lighter if pressed back into the pan and allowed to rise a second time. Bake in hot oven, about three-quarters of an hour for medium-sized loaves.

In making baking powder biscuits, etc., do not knead the dough, and mix as soft as possible to handle.

In cooking cereals, add a teaspoonful salt to a cupful of water. Cook in double boiler; the longer, the better the flavor and the more digestible. What is left over of the cereal may be reheated the next day or cut into slices, floured and fried.

In making fritters the ingredients should be put together as quickly as possible, and then all beaten thoroughly; add whites of eggs last. Clarified drippings, lard or butter, or any two mixed, may be used for frying.

Fritters will be lighter if no sugar be added to the batter.

Fresh eggs are heavier than stale eggs. If they float in water they are not fresh. Eggs are more wholesome when cooked just under the boiling point.

Biscuit, bread or cake that is stale can be freshened by dipping for an instant into cold water, then placing in the oven for 10 or 15 minutes. Use immediately.

For your kitchen you need the best Cutlery. "Colonial" is the only reliable ware.

Buckwheat cakes made with yeast should not be stirred after they have risen.

If griddle cakes stick to the griddle, sprinkle on salt, and rub with a coarse cloth before greasing.

Potato Yeast.

Two tablespoons salt, two tablespoons sugar, three tablespoons flour; mix and scald with one pint boiling water. Sandwiches

Sandwiches when nicely made are very appetizing. They are indispensable at picnics, luncheons, teas, etc. White, graham, brown bread or rolls may be converted into sandwiches. There is scarcely any limit to their filling, for eggs, meat, fowl, fish, fruit, salads, jams, cheese and chopped nuts may all be used, according to individual taste. The materials used should be sliced or minced as fine as possible. Butter should be of the best quality and used sparingly. When sandwiches are made a few hours before they are to be used pile on dish and cover with a damp napkin. They will retain their freshness.

## Preserves and Jellies

Fruit for jellies should be at their prime. If over-ripe, too much boiling will be required. Some fruits yield their juices more readily than others, but the general rule is a pound of sugar to a pint of juice. When cooking fruits of the nature of quince or crab apple, to obtain the juice add sufficient water to cover. A good rule is to boil the juice 15 to 20 minutes before adding sugar, which has previously been heated in the oven, then all boiled a very few minutes together.

Currants and juicy berries are crushed and cooked without adding any water

Jelly glasses should be kept standing in hot water, and when ready to fill wiped dry and filled while still hot.

Too much boiling makes jelly hard or pasty.

In making a large quantity of jelly it is better to divide into smaller quantities, cooking 2 or 3 quarts at a time, as the jelly will be finer, not having boiled too long to secure the necessary evaporation.

A little may be tried in a small dish first. Do not squeeze through the jelly bag, as that makes cloudy jelly. Simply let it drip.

When jelly is cold, cover with paraffine or with white paper wet with brandy. Should jelly not be quite firm enough, it should be allowed to stand in the open glasses a few days in the sun.

Keep preserves in a cool, dark, dry place.

The juice that is left in the jelly bag may be squeezed out afterward and made into jelly the same way, but it will not be so clear.

In making preserves, use only porcelain lined or granite kettles. Use granite or wooden spoons for stirring.

Preserves should boil very gently to prevent burning.

For preserves a good syrup is made in the proportion of  $\frac{1}{2}$  pint of water to a pound of sugar.

Use granulated sugar. If a very little lemon juice be added to strawberry or peach juice there will be no trouble in jellifying.

### Preserved German Prunes.

To a pound of fruit take  $\frac{1}{2}$  pound sugar. Let sugar come to a boil in water, and pour over the fruit eight times. Then cook syrup till thick enough, put in fruit and let come to a boil.

MRS. MAX BORNSTEIN.

---

**For your kitchen you need the best Cutlery. "Colonial" is the only reliable ware.**

**Spiced German Prunes.**

Wash the prunes, remove the stones, and in place of the stones put in almonds. Take the best wine vinegar, water and sugar to taste. Tie in a bag some whole cinnamon, cloves and allspice; boil together with vinegar. After boiling, let it get lukewarm. Then pour over the prunes. Let stand, and each day for nine days let vinegar come to a boil and pour over prunes. The last day cook the vinegar down some, then put in prunes and let come to a boil. There should be sufficient liquid to cover them. Keep in stone or glass jar. Grapes (black ones) may be spiced the same way.

MRS. A. E. WILZIN.

**Peach Preserves.**

Remove stones from peaches. Measure 1 pound sugar to 1 pound fruit. In preserving kettle put 1 layer sugar, then layer of fruit, until all is used. Add a few kernels of the peach stones, and let warm slowly until the sugar is melted. Boil slowly for half hour; then remove peaches to a flat dish. Let the syrup boil 15 minutes longer. Place in jars  $\frac{3}{4}$  full of peaches, adding syrup to fill.

MRS. MAX BORSTEIN.

**Brandied Peaches.**

Four pounds of fruit, 4 pounds of sugar, 1 pint of white brandy. Make a syrup of the sugar and enough water to dissolve it. Let this come to a boil. Put the fruit in and boil five minutes. Having removed the fruit carefully, let the syrup boil 15 minutes longer, or until it thickens well. Add the brandy and take the kettle at once from the fire. Pour the hot syrup over the fruit and seal. If after the fruit is taken out and put in jars a reddish liquor oozes from them, drain this off before adding the clear syrup.

**Sweet Pickled Peaches.**

Boil sugar, vinegar and cinnamon 20 minutes. Dip peaches quickly in hot water, then rub off the fur with towel, stick each peach with clove. Put in syrup and cook until soft, using one-half of the peaches at a time. To  $\frac{1}{2}$  peck peaches take 2 pounds brown sugar, 1 pint vinegar, 1 ounce stick cinnamon and cloves.

MRS. R. LOBE.

**Bottled Green Gages.**

Select green gages that are not too ripe, make small holes all over them, put them in large bottle, fill them with thin syrup, cork and tie down. Place them in a saucepan of water, bring gently to a boil, and simmer until the fruit turns brown. Take from fire. Leave bottles in water for a day. Boil again for 10 minutes, and fruit is ready.

Put the berries in a deep agate or porcelain dish, pour the sugar on top like a crust and the water on top of that. Cook very slowly. When they break into a boil, cover just a few moments—not long or the skins will burst—then uncover and cook until tender. Take up carefully and spread on oiled plates to dry.

**Strawberry Jam.**

Be careful to get best berries, not sandy ones. Pick berries, weigh them, and to each pound of fruit take  $\frac{3}{4}$  pound granulated sugar. Boil together 20 minutes. Remove with skimmer all fruit. Boil juice to thick syrup, replace fruit and let come to a boil; then fill in glasses.

## Pickles and Relishes

Use only the best cider or vinegar. Boil pickles in porcelain lined, granite or stone vessels. A very small piece of alum added to vinegar when scalding pickles the first time renders them crisp and tender, but too much alum is injurious. Keep in a dry, cool place in glass or stoneware. If white specks appear in the vinegar, drain off and scald, adding a handful or two of sugar, pouring hot over pickles again. A little horseradish and a few cloves help to preserve the vinegar. If put away in a stone crock, put an inverted plate over the top and a heavy stone on the plate, to keep the pickles well covered with liquid. The brine for pickles should be strong enough to float an egg, about a pint of salt to a gallon of water. Before putting pickles in vinegar, they should be cold and perfectly dry. Pour vinegar over, boiling hot, as raw vinegar does not keep well. Keep pickles from the air and have the vinegar at least two inches over the top of the pickles. Use only a wooden spoon. Pickles in open jars should be stirred occasionally, and the soft ones taken out, and the vinegar scalded and poured back hot. For dill pickles wash off and skim every five days.

### Piccalily.

15 pounds tomatoes, 10 pounds cabbage, 3 bunches celery, 6 large green peppers, 6 large onions, 5 cents worth celery seed, 5 cents worth mustard seed. Chop fine and salt each separately over night. Let stand a couple of days and repeat the boiling three times.

Place in pan and salt them over night. In the morning dry with a cloth and put them in a jar, alternating with layers of onions (cut in slices) and sprinkle over them the powder, peppers and mustard seed. Fill the jar with cold vinegar. Stir together salad oil, Colman's mustard and a little cayenne pepper into a thick paste, and spread this over the top of the pickles before putting on the cover of the jar. Place them away for six weeks, and then stir with a wooden spoon. They are then ready for use.

Wash the pickles and put a layer of them and a couple of green peppers in a jar. Cover with layer of grape leaves and dill, using leaves and stems. Continue until jar is full of alternate layers of pickles and peppers and grape leaves and dill. Fill the jar with brine, place a cloth over top layer, and add a weight of some kind. Every few days take off the cloth and wash off scum, and then replace it. They should be fit to use in 10 to 12 days.

MRS. PAULINE JOSEPH.

### Green Tomato Pickles or Any Kind of Pickles.

Two pints vinegar, 1 small lump alum, 1 cupful sugar, mixed spices to taste, 1 small root horseradish. Boil together and pour over pickles. This is enough for 2 quarts pickles. Seal tight. ### Stains.

Medicine stains may be removed from silver spoons by rubbing them with a rag dipped in sulphuric acid, and washing it off with soap-suds. Stains may be removed from the hands by washing them in a small quantity of oil of vitriol and cold water without soap.

### Grass Stains.

A simple way to remove grass stains to spread butter on them and lay the article in the hot sunshine, or wash with alcohol.

### To Remove Fruit Stains.

Fruit stains on white goods can very often be removed by pouring boiling water directly from the kettle over the spots, or soak them in sweet milk. This must be done before putting into water or before soap is used.

### To Prevent Rust on Flatirons.

Beeswax and salt will make them as smooth as desired. Tie a lump of wax in a rag and keep for that purpose, and when the iron is hot rub it first with the wax, then scour it with the salt.

Iron rust may be removed from delicate fabrics by covering spot thickly with cream of tartar, then twisting cloth to keep cream of tartar over spot. Put in a saucepan of cold water and heat water gradually to boiling point.

### To Clean Silver and Gold Lace.

Take a piece of woolen cloth, place the lace on this, free it of all dust with a brush, and then apply some alum (which has been powdered and sifted through a fine sieve) with a soft brush. This will remove the tarnish and restore its former brightness.

Sapolio removes ink stains. They can also be removed by laying the stained part in sour milk over night.

A pitcher of cold water on a table in your room does much to purify the air.

Open canned fruit and vegetables one hour or so before needed. It is richer when the oxygen is thus restored.

Hot vinegar will remove paint from window glass.

Stains on the hands can be removed by rubbing with salt moistened with lemon juice.

To clean piano keys rub over with alcohol.

A few tablespoonfuls of turpentine added to a bucket of water will prevent the daintiest fabric from fading.

A flannel cloth saturated with kerosene will remove roughness and discolorations from porcelain lined bathtubs and bowls.

Wash wringers are said to wear longer if wiped over with cloth saturated with kerosene each week before setting away.

To remove white spots from furniture dip a cloth into hot water near the boiling point. Place over spot, remove quickly and rub over spot with dry cloth. Repeat if spot is not removed. Alcohol or camphor quickly applied may be used.

Tumblers which have contained milk should be first rinsed in cold water before washing in hot water.

To remove dust from rattan furniture, use a small painter's brush.

Put some baking soda into the hot water for washing silver. It cleanses well and gives a nice polish.

When boiling eggs, should one rise to the surface, it is not fresh.

To wash carafes half fill with hot soapsuds to which is added 1 teaspoonful washing soda. Let stand  $\frac{1}{2}$  hour, occasionally shaking. Empty, rinse with hot water, drain, wipe outside.

After boiling or frying, if any fat has spattered on range, wipe surface at once with newspaper.

To remove fruit stains, pour boiling water over stained surface, having it fall from a distance of three feet. This is much better way than dipping stain in and out of hot water, or wring articles out of cold water and hang out of doors on a frosty night.

A solution of pearl-ash in water thrown upon a fire extinguishes it instantly. The proportion is a quarter of a pound dissolved in some hot water, and then poured into a bucket of common water.

Knives should never be dipped into hot water, as it injures the handles. If they do come off they may be fastened on in the following manner: Take powdered resin and mix with it a small quantity of powdered chalk, whiting or slacked lime. Fill the hole in the handles with the mixture, heat the tong of the knife or fork and thrust in. When cold it will be securely fastened.

All sorts of vessels and utensils may be purified from long-retained smells of every kind by rinsing them out well with charcoal powder after the grosser impurities have been scoured off with sand and potash.

Scald your woodenware often and keep your tinware dry.

Before sweeping old carpets, sprinkle with pieces of newspaper wrung out of water. After sweeping, wipe over with cloth wrung out of a weak solution of ammonia water, which seems to brighten colors.

Do not heat butter or fat in any glazed agate or porcelain-lined vessel, as it cracks the glazing.

When making pot roasts, stewing meats of any kind or boiling puddings, always use a vessel with a tight-fitting lid.

A heavy iron pan, called a spider, is best for browning flour in fat or butter, as it does not burn so quickly.

Never fill a vessel more than three-quarters full when cooking, as it is apt to boil or fry over, thereby diminishing the food and ruining the stove.

When opening eggs, always have several vessels handy, and open each egg into a separate dish, as one drop of a bad egg will make all the rest unfit for use.

When boiling eggs in winter, to prevent them from cracking, lay them first in warm water for a few minutes before putting them into the boiling water.

#### Uses of Sale Bread.

Never throw stale bread away, as it is best for making stuffings for meats, poultry, game and fish. It is also good when put into the oven, browned and grated. It can be used instead of flour to roll fish in before frying them. Cutlets and liver can be treated likewise. When browned and grated it can be used in making bread tart, almond tart and grated apple tart. When not grated it is good for bread puddings of all kinds, bread pancakes, bread fritters, bread griddle cakes, bread balls, etc., also in soups and various other cookery.

#### Lemons.

To get the better of the bilious system, without blue pills, calomel, etc., take the juice of a lemon in a glass of water, just before retiring. In the morning, about half an hour before breakfast, do the same thing. Eating lemons clear irritates the stomach. Keep this up for several days—or as long as necessary.

# Home Remedies

## Cure for Toothache.

$\frac{1}{4}$  of a pint of best alcohol,  $\frac{1}{2}$  ounce of chloroform,  $\frac{1}{2}$  ounce of arnica,  $\frac{1}{4}$  ounce of oil of cloves. Mix and apply with a piece of absorbent cotton; rub also on the gums and upon the face against the tooth. Sure cure.

For a burn apply equal parts of white of egg and olive oil mixed together. Then cover with a piece of old linen. If applied at once no blister will form. Or apply at once cooking soda, then cover with cloth and keep the same wet with cold water. This takes out the pain and prevents blistering.

## Tainted Breath.

Dissolve  $\frac{1}{2}$  teaspoonful of soda in boiling water and drink it. Orris root is also good, and charcoal tablets sweeten the breath.

## To Remove Warts.

Warts may be removed by steeping or soaking a small piece of beef all night in vinegar. Cut what will cover the wart and tie it on. Strips of sticking plaster will fasten it on. Take the meat off in the daytime and put it on at night. In two weeks the wart will die and fall off.

## Cough Cure.

Three-eighths of an ounce of anise seed,  $\frac{3}{8}$  ounce of stick (or root) licorice,  $\frac{3}{8}$  ounce senna leaves and  $\frac{1}{2}$  pint Jamaica rum. Pour 1 pint boiling water on the herbs, let them simmer slowly down to  $\frac{1}{2}$  pint. Then strain. When cool add  $\frac{1}{2}$  pint of best syrup and  $\frac{1}{2}$  pint of rum. Take as often as required.

## Cough Syrup.

One ounce each hoarhound and licorice. 2 ounces gum arabic, 1 pint molasses and 1 teacupful of vinegar. Boil the hoarhound in 1 quart of water; dissolve the licorice and gum arabic in a little water first. Strain the hoarhound before adding the other ingredients. Put in vinegar when nearly done.

## How to Cure Nose Bleed.

Snuffing up powdered alum will generally control bleeding from the nose. The best remedy is in the vigorous motion of the jaws, as if in the act of mastication, pressing the nose firmly between the finger and the thumb for a few minutes. This alone will often stop the bleeding. If it should not, then try what bathing the nose, forehead and nape of the neck with water quite cold will do.

**If you want courteous attention and the best value for the money, buy your new suit at J. Bedelsheimer's, First and Columbia.**

**Quinsy, Sore Throat.**

Roast 4 large onions. Peel them quickly and slightly pound. Add to them a little sweet oil. Place them while hot in a thin muslin bag that will reach from ear to ear, first thoroughly rubbing the throat, in this way getting a good circulation of blood. Apply as warm as possible to the throat. Change when the strength of the onions is exhausted. Flannel must be worn around the neck after the onion is removed.

**To Induce Sleep.**

Have the body gently rubbed all over with a towel wrung out of hot salt water.

**Palpitation of the Heart.**

A glass of ordinary soda water has been known to be a good cure for a bad attack of palpitation of the heart.

**Cold in the Head.**

Inhale spirits of camphor when the first symptoms appear. Put 1 or 2 drops of the camphor on a lump of sugar, dissolve in a wine-glassful of water, and take a teaspoonful every 2 hours.

**To Kill Corns.**

Soak bread in vinegar, bind on day and night, and they will come out by the roots.

**Cramp in the Leg.**

A garter applied tightly around the limb affected will, in most cases, speedily remove the complaint. When it is more obstinate a brick should be heated, wrapped in flannel and placed at the foot of the bed. Diligent and long-continued friction is also very good.

**Choking.**

To prevent choking, break an egg into a cup and give it to the person choking to swallow. If one egg does not answer the purpose try another. The white is all that is necessary.

**Hiccough Cure for Children.**

A lump of sugar saturated with vinegar and given to the little one to suck will relieve it instantly.

**Felon Cure.**

Apply a poultice of raw onions 3 times a day, and 4 days will effect a cure.

**For Sprains.**

Mix and shake in a bottle the white of an egg, 1 tablespoonful vinegar, 1 tablespoonful spirits of turpentine.
